

Single-sided edgebander

â€”Designed for entry-level to mid-sized businesses, the Akron 400 from Biesse is an automatic single-sided edgebander suitable for applying banding material in coils such as PVC / veneer and strips such as HPL & Solid Wood to straight panels with a maximum thickness of 60 mm. It offers many of the functions typical of upper-range edgebanding machines, such as a rectifier and multi-purpose rounding unit in one solid, compact machine. The Akron 400 can be customized with a number of different options, such as upgrade from manual operation to touch-screen NC control. A smart User Friendly Touch Screen system accommodates even inexperienced operators. Biesseamerica.com
